Surface Tension in Microsystems

Pierre Lambert 2013-08-31 This book describes how surface tension effects can be used by engineers to provide mechanical functions in miniaturized products (1 mm). Even if precursors of this field such as Jurin or Laplace already date back to the 18th century, describing surface tension effects from a mechanical perspective is very recent.brThe originality of this book is to consider the effects of capillary bridges on solids, including forces and torques exerted both statically and dynamically by the liquid along the 6 degrees-of-freedom.brIt provides a comprehensive approach to various applications, such as capillary adhesion (axial force), centering force in packaging and micro-assembly (lateral force) and recent developments such as a capillary motor (torque).

Innovative Institutions, Public Policies and Private Strategies for Agro-Enterprise Development-Ralph D Christy 2014-09-12 In an effort to promote agro-enterprises and agro-industries as viable forms of inclusive development, the Food and Agriculture Organization of the United Nations (FAO) and The Cornell International Institute for Food, Agriculture and Development (CIIFAD) in collaboration with the International Association of Agricultural Economists (IAAE), organized an international symposium on the topic “Innovative Institutions, Public Policies, and Private Strategies for Inclusive Agro-Enterprise Development”, as part of the Triennial Meetings of the IAAE held in Foz do Iguaçu, Brazil, in August 2012. This book contains the major papers presented at the symposium, which feature a wide range of country and regional experiences and examine the influence of markets and technology transfer to agro-enterprises on food security, poverty, and economic growth. The contributions also identify alternative market access strategies for sustainable economic development. This volume will enrich existing knowledge of agro-enterprises as a channel for promoting inclusive growth and reducing poverty levels across developing and emerging markets. Introduction to Electronic Commerce and Social Commerce-Efraim Turban 2017-04-23 This is a complete update of the best-selling undergraduate textbook on Electronic Commerce (EC). New to this 4th Edition is the addition of material on Social Commerce (two chapters); a new tutorial on the major EC support technologies, including cloud computing, RFID, and EDI; ten new learning outcomes; and video exercises added to most chapters. Wherever appropriate, material on Social Commerce has been added to existing chapters. Supplementary material includes an Instructor’s Manual, Test Bank questions for each chapter; PowerPoint Lecture Notes; and a Companion Website that includes EC support technologies as well as online files. The book is organized into 12 chapters grouped into 6 parts. Part 1 is an Introduction to E-Commerce and E-Marketplaces. Part 2 focuses on EC Applications, while Part 3 looks at Emerging EC Platforms, with two new chapters on Social Commerce and Enterprise Social Networks. Part 4 examines EC Support Services, and Part 5 looks at E-Commerce Strategy and Implementation. Part 6 is a collection of online tutorials on Launching Online Businesses and EC Projects, with tutorials focusing on e-CRM; EC Technology; Business Intelligence, including Data-, Text-, and Web Mining; E-Collaboration; and Competition in Cyberspace. the following="" are="" not="" related="" to="" any="" specific="" chapter="" they="" cover="" the="" essentials="" ec="" technologies="" and="" provide="" a="" guide="" relevant="" resources.="" p

Proceedings of the International Symposium on Research of Arts, Design and Humanities (ISRADH 2014)-Oskar Hasdinor Hassan 2015-09-22 This book examines the interaction between art, design, technology and the social sciences. It features 56 papers that were presented at the International Symposium on Research of Arts, Design and Humanities, ISRADH 2014, held at Sutera Harbour Resort, Kota Kinabalu, Malaysia. Complete with helpful diagrams and tables, the papers cover such topics as artificial reef development, racial discourse in the social media, stoneware as a replacement material for modern ventilation walls, and factors contributing to internet abuse in the workplace. Overall, the coverage focuses on global design trends and demands with an emphasis on people, business and technology. Inside, readers will find information on art and science in industrial applications; art management and entrepreneurship; cognitive, psychological and behavioral science; design technology and sustainable development; humanities and social applications in quality of life; social implications of technology; and visual communication and technologies. Taking a multi-disciplinary approach, the book features insightful discussions among academicians and industrial practitioners on the evolution of design that will appeal to researchers, designers and students.

Industrial Engineering and Operations Management I-João Reis 2019-04-13 Based on the 2018 International Joint Conference on Industrial Engineering and Operations Management (IJCIEOM) conference that took place in Lisbon, Portugal, this proceedings volume is the first of two focusing on mathematical applications in digital transformation. The different contributions in this volume explore topics such as modelling, simulation, logistics, innovation, sustainability, health care, supply chain, lean manufacturing, operations management, quality and digital. Written by renowned scientists from around the world, this multidisciplinary volume serves as a reference on industrial engineering and operations management and as a source on current findings for researchers and students aiming to work on industrial-related problems.

Drought phenotyping in crops: From theory to practice-Philippe Monneveux 2014-02-12 This topic is a unique attempt to simultaneously tackle theoretical and practical aspects in drought phenotyping, through both crop-specific and cross-cutting approaches. It is designed for - and will be of use to - practitioners and postgraduate students in plant science, who are grappling with the challenging task of evaluating germplasm performance under different water regimes. In Part I, different methodologies are presented for accurately characterising environmental conditions, implementing trials, and capturing and analysing the information this generates, regardless of the crop. Part II presents the state-of-art in research on adaptation to drought, and recommends specific protocols to measure different traits in major food crops (focusing on particular cereals, legumes and clonal crops). The topic is part of the CGIAR Generation Challenge Programme’s efforts to disseminate crop research information, tools and protocols, for improving characterisation of environments and phenotyping conditions. The goal is to enhance expertise in testing locations, and to stimulate the development and use of traits related to drought tolerance, as well as innovative protocols for crop characterisation and breeding.

Climate Change in Cities-Sara Hughes 2017-09-27 This book presents pioneering work on a range of innovative practices, experiments, and ideas that are becoming an integral part of urban climate change governance in the 21st century. Theoretically, the book builds on nearly two decades of scholarships identifying the emergence of new urban actors, spaces and political dynamics in response to climate change priorities. However, it further articulates and applies the concepts associated with urban climate change governance by bridging formerly disparate disciplines and approaches. Empirically, the chapters investigate new multi-level urban governance arrangements from around the world, and leverage the insights they provide for both theory and practice. Cities - both as political and material entities - are increasingly playing a critical role in shaping the trajectory and impacts of climate change action. However, their policy, planning, and governance responses to climate change are fraught with tension and contradictions. While on one hand local actors play a central role in designing institutions, infrastructures, and behaviors that drive decarbonization and adaptation to changing climatic conditions, their options and incentives are inextricably emeshed within broader political and economic processes. Resolving these tensions and contradictions is likely to require innovative and multi-level approaches to governing climate change in the city: new interactions, new political actors, new ways of coordinating and mobilizing resources, and new frameworks and technical capacities for decision making. We focus explicitly on those innovations that produce new relationships between levels of government, between government and citizens, and among governments, the private sector, and transnational and civil society actors. A more comprehensive understanding is needed of the innovative approaches being used to navigate the complex networks and relationships that constitute contemporary multi-level urban climate change governance. Debra Roberts, Co-Chair, Working Group II, IPCC 6th Assessment Report (AR6) and Acting Head, Sustainable and Resilient City Initiatives, Durban, South Africa “Climate Change in Cities offers a refreshingly frank view of how complex cities and city processes really are.” Christopher Core, Associate Professor and Chair, Department of Politics and Public Administration, Ryerson University, Canada “This book is a rare and welcome contribution engaging critically with questions about cities as central actors in multilevel climate governance but it does so recognizing that there are lessons from cities in both the Global North and South.” Harriet Bulkeley, Professor of Geography, Durham University, United Kingdom “This timely collection provides new insights into how cities can put their rhetoric into action on the ground and explores just how this promise can be realised in cities across the world - from California to Canada, India to Indonesia.”

Model Driven Engineering Languages and Systems-Robert B. France 2012-08-23 This book constitutes the refereed proceedings of the 15th International Conference on Model Driven Engineering Languages and Systems, MODELS 2012, held in Innsbruck, Austria, in September/October 2012. The 50 papers presented in this volume were carefully reviewed and selected from a total of 181 submissions. They are organized in topical sections named: metamodels and domain specific

modeling; models at runtime; model management; modeling methods and tools, consistency analysis, software product lines; foundations of modeling; static analysis techniques; model testing and simulation; model transformation; model matching, tracing and synchronization; modeling practices and experience; and model analysis.

Pharmaceutical Prices in the 21st Century-Zaheer-Ud-Din Babar 2014-12-05 This book provides an overview of the global pharmaceutical pricing policies. Medicines use is increasing globally with the increase in resistant microbes, emergence of new treatments, and because of awareness among consumers. This has resulted in increased drug expenditures globally. As the pharmaceutical market is expanding, a variety of pharmaceutical pricing strategies and policies have been employed by drug companies, state organizations and pharmaceutical pricing authorities.

Theories of Information Behavior-Karen E. Fisher 2005 This unique book presents authoritative overviews of more than 70 conceptual frameworks for understanding how people seek, manage, share, and use information in different contexts. A practical and readable reference to both well-established and newly proposed theories of information behavior, the book includes contributions from 85 scholars from 10 countries. Each theory description covers origins, propositions, methodological implications, usage, links to related conceptual frameworks, and listings of authoritative primary and secondary references. The introductory chapters explain key concepts, theory/method connections, and the process of theory development.

Smart Tass-Mimi Jean Pamfiloff 2017-04-08 From New York TimesBestseller Mimi Jean Pamfiloff comes SMART TASS, a new Romantic Comedy. He’s the hot college quarterback all the girls want.She’s the smart girl he loves to pick on.And now that they’re all grown up, things are about to get geekin’ ugly. My name is Tass. I’m smart, I’m driven, and I am determined not to let prankster Hunter Johnson continue raining on my parade. When we were little, he’d pull my hair and call me names. When we were teenagers, he’d throw food and tease me for being a flat-chested virgin. But now that we’ve ended up at the same college, he’s out of his hot head if he thinks he can keep messing with my life. It’s like he’s fixated on me or something. Well, guess what, Mr. Amazefootball? I’m not that geeky little girl anymore and you do not screw with a smart woman. So what’s my plan? It’s definitely wild, and he’s about to find out.

Wyoming Brave-Diana Palmer 2016-12-27 The Wyoming men are back! In their quest for true love on the range, are these ranchers bold enough to open their hearts to the women under their protection? Ren Colter may own an enormous ranch in Wyoming, but he scorns his wealth. He’s closed himself off since his fiancée left him months ago, so he’s shocked when he allows Meredith Grayling to stay with him. He tells himself it’s only to protect the blonde beauty from a stalker, but Ren’s alpha instincts soon kick in. The last thing Merrie wants is a devastatingly handsome man like Ren lurking around her. He’s too experienced, too appealing for her already shot nerves. What she needs is just to get away from it all: the man haunting her waking dreams and the one hunting her like an animal. But no woman escapes this Colter cowboy!

Tom Kundig-Tom Kundig 2015-11-10 In Tom Kundig: Works, the celebrated Seattle-based architect presents nineteen new projects, from Hawaii to New York City. Kundig’s award-winning houses, known for their rugged yet elegant and welcoming style, are showcased in lush photography with drawings and sketches, and appear alongside his commercial work—from multistory complexes to the Tacoma Art Museum to a line of hardware (handles, door pulls, hinges, and more). In firsthand accounts, Kundig describes the projects and his design process with many personal anecdotes, making Tom Kundig: Works as much memoir as monograph. The book also includes an introduction by design editor Pilar Viladas and in-depth conversations with Kundig’s frequent collaborators—“gizmolgist” Phil Turner and contractor Jim Dow (Schuchart/ Dow)—and clients (Bigwood Residence and Studhorse).

Literacy Teacher Educators-Clare Kosnik 2013-04-19 Literacy Teacher Educators: Preparing Teachers for a Changing World brings together the perspectives of 26 literacy/English teacher educators from four countries: Canada, U.S., UK, and Australia. In this unique text the contributors, of whom many are renowned experts in critical literacy and multiliteracies, provide readers with an overview of trends in literacy/English teacher education. The chapters begin with authors’ personal stories and current research, giving readers insight into the personal and professional worlds of the contributors. Included in each chapter is a rich description of approaches to literacy instruction in teacher education. These exemplary teacher educators show in concrete detail how they are addressing our evolving understanding of literacy . This timely text, written in a highly engaging style, will be of value to teacher educators throughout the world. I have never read anything quite like this book. It contains explicit representations of the conceptual frames and work of distinguished literacy teacher educators at various stages in their careers, accounts that provide a strong counter-narrative to the mainstream discourse in policy and education, that fully embrace the uncertainties and complexities of practice."
